

Hot Water Generation – Steam/Water Single Wall

Digital-Flo® Semi-Instantaneous Steam/Water Shell and Tube Heat Exchanger

Model DFS9080

DFS9080 is a complete pre-piped single wall semi-instantaneous steam/water shell and tube heater. The assembly includes a properly sized shell and tube heat exchanger with a Digital Recirculating Valve (DRV80).

Digital technology provides enhanced water temperature control accuracy and enhanced user safety in a single control component.

Operational Specifications

- +/-2°F water temperature control at points of use 25'
- downstream during demand
- +/-2°F water temperature control during zero system demand
- "idling" periods
- 2°F minimum valve inlet to outlet temperature requirement (system recirculation temperature loss)
- Automatic shutoff of hot water flow upon cold water inlet supply failure
- Automatic shutoff of hot water flow in the event of a power failure
- Programmable set point range of 81-158°F (27-70°C)
- Programmable 1st level hi/lo temp alarm display
- Programmable temperature error level for double safety shutdown.

Technical Specifications

- Maximum steam pressure: 15 PSIG constant.
- Maximum domestic pressure: 150 PSI
- Minimum recirculation flow: 10 GPM
- Design conditions: Domestic-85 GPM at 100°F delta T using 15 PSIG steam; 106 GPM at 120 °F Setpoint using Blend Formula
- Complete assembly Lead Free Compliant
- All domestic side valve fittings and isolation valves, strainers, inlet/return check valves, inlet system blend and return thermometers pre-piped.
- DRV – all wetted parts 316 stainless steel
- DRV to be UL Listed
- Heat exchanger shall be U-bend 3/4" copper tubes expanded into 304 stainless steel tube sheets
- Water pipe of type L copper
- Fabricated carbon steel frame with machine grade enamel paint
- 120 volt power supply required
- Secondary (double) safety shut-off valve included
- SAGE™ enabled

Connectivity

SPCO Relay Outputs – Relay which is energized during operation.

LCD Display – Provides information on set point, delivered temperature, error messages and alert conditions.

RS485 Serial Port – Connects the DRV to either Modbus® RTU or SAGE™. (See DFS1540BS for package with SAGE™.)

Modbus® RTU – DRV can be configured to communicate directly with Building Automation Systems (BAS) using Modbus® RTU protocol.
