

Trap Valve Stations

The Problem It Solves

Trap Valve Stations (TVS) are compact modules that combine isolation valves, test ports, strainers, and traps into one sleek, pre-assembled unit. Our Trap Valve Stations come pre-configured for your system, with faster serviceability and built-in safety.

Key Features

- ✓ Quick isolation, testing, and maintenance
- ✓ Reduces leak points and installation time
- ✓ Ideal for space-constrained plants or high-maintenance zones
- ✓ Permits combining products with exact face-to-face dimensions
- ✓ Connection : threaded, flanged
- ✓ Size: 1/2" - 1"
- ✓ Material: cast iron, stainless steel, forged steel

Key Client Benefits

- 1** Reduced steam loss and lower energy bills
- 2** Safer operations by preventing flooding and overheating
- 3** Easy, in-line repairability
- 4** Extended equipment life with consistent condensate removal
- 5** Audit-ready systems with clear performance documentation
